

AZAAN TRADING & CONTRACTING COMPANY (ATC)

In Strategic Collaboration with SPC-KSA

Engineering Excellence

Global Standards

National Commitment

Company Introduction

Azaan Trading & Contracting Company (ATC) is a Pakistan-based engineering, construction, and technical services company operating in strategic collaboration with **SPC-KSA**, a well-established contracting organization with extensive operational experience in Saudi Arabia.

SPC-KSA has successfully delivered projects for **private industrial clients, multinational corporations, and American military facilities in the Kingdom of Saudi Arabia**, maintaining international standards in quality, safety, and technical performance.

Through this collaboration, **ATC brings Saudi engineering expertise, operational discipline, and international project execution standards to Pakistan**, focusing on infrastructure development, power systems, industrial services, and advanced facility management.

The company is positioned to serve **public sector institutions, industrial organizations, defense infrastructure, and private commercial clients** requiring reliable engineering and construction services.

Vision, Mission & Core Values

Vision

To establish ATC as one of Pakistan's most reliable and technically capable contracting companies, combining **Saudi engineering expertise with international project standards**.

Mission

To deliver professional engineering, infrastructure, and maintenance services with **integrity, safety, efficiency, and technical precision**, while building long-term partnerships with clients.

Core Values

- Integrity and Accountability
- Technical Excellence
- Safety and Sustainability
- Innovation and Reliability
- Partnership and Long-Term Value

Strategic International Collaboration

ATC operates in collaboration with **SPCSA (Saudi Arabia)**, which brings over a decade of engineering and contracting experience in large-scale industrial and infrastructure projects.

SPCSA's experience includes projects for:

- **American Military Facilities in Saudi Arabia**
- **Herfy Foods Company** – nationwide restaurant infrastructure
- **Crown Gulf Company** – electrical infrastructure projects
- **ROSHN Housing Development** – Saudi Arabia's mega housing program
- **Industrial and power sector developments**

Through this collaboration, **ATC transfers international construction practices, engineering supervision, and operational systems into Pakistan's infrastructure and industrial sectors.**

Core Engineering & Construction Services

ATC provides **integrated engineering and contracting services**, covering the entire project lifecycle from **design and procurement to construction, commissioning, and long-term maintenance**.

Civil & Infrastructure Construction

- Industrial and commercial building construction
- Structural concrete and steel works
- Warehouses and logistics facilities
- Road constructions
- Boundary walls and site infrastructure
- Drainage and sewerage systems
- Facility renovation and structural upgrades

Electrical & Power Infrastructure

- Medium and low voltage distribution networks
- Transformer installation and replacement
- RMU installation and testing
- Substation installation and maintenance
- Power cabling and load management systems
- Generator installation and operation & maintenance
- Industrial lighting and electrical automation systems

Mechanical & HVAC Engineering

- HVAC system installation and maintenance
- Industrial chillers and ventilation systems
- Exhaust fan systems (including Greenheck industrial systems)
- Walk-in freezers and cold storage facilities
- Firefighting systems (wet & dry)
- Industrial piping and plumbing works
- Mechanical equipment installation and repair

Oil, Gas & Petroleum Infrastructure

- Petrol pump civil works
- Fuel tank and dispensing system installation
- Fuel pipeline and pumping systems
- Pump calibration and maintenance
- Oil depot maintenance and facility upgrades

Industrial & Factory Maintenance

- Electrical and mechanical maintenance for manufacturing plants
- Equipment overhaul and system upgrades
- Preventive maintenance programs
- Spare parts supply and procurement
- Technical maintenance contracts for industrial facilities

Defense & Military Infrastructure

Through its Saudi operations, **SPC provides engineering and facility maintenance services to American military facilities in Saudi Arabia.**

This experience allows ATC to support **defense infrastructure and secure facility projects in Pakistan.**

Services include:

- Camp infrastructure development
- Power and HVAC facility maintenance
- Electrical and communication installations
- Security and access control systems
- Rapid infrastructure deployment and maintenance units

All projects are executed under **strict safety, confidentiality, and compliance protocols.**

Information Technology & Smart Infrastructure

- Data center infrastructure
- CCTV and security surveillance systems
- Access control systems
- Building automation systems (IoT based)
- Fiber optic cabling networks
- IT power infrastructure and backup systems

Operations & Maintenance Services

ATC provides long-term **technical maintenance and operational support** for infrastructure and industrial facilities.

Services include:

- Substation maintenance
- Generator operation and maintenance
- HVAC system maintenance
- Firefighting and water system maintenance
- 24/7 technical support services
- Annual maintenance contracts (AMC)

Trading & Technical Procurement

ATC also operates a procurement division supplying:

- Electrical equipment and switchgear
- Mechanical equipment and industrial machinery
- HVAC systems and materials
- Firefighting and plumbing materials
- Power cables and transformers
- Industrial safety equipment (PPE)

The company supports **local and international procurement for engineering projects**.

International Project Experience (Saudi Arabia)

Key project references include:

American Military Facilities – Saudi Arabia

- Electrical maintenance works
- HVAC facility maintenance
- Camp infrastructure support
- Power distribution systems

Herfy Foods Company

- Maintenance of HVAC systems, chillers, and industrial exhaust fans
- Greenheck ventilation systems (2500 CFM)

Crown Gulf Company

- Transformer installation
- RMU installation and electrical testing

Badoor Al Emar Company

- Medium voltage electrical infrastructure works
- Civil and electrical support services

ROSHAN VILLAS - MEGA PROJECT

- Civil construction works for residential villa structures
- Structural concrete works including foundations, slabs, and columns
- Masonry, plastering, and finishing works
- Infrastructure preparation for villa clusters
- Electrical and mechanical service coordination within residential units
- Site supervision and technical support for construction activities
- Coordination with project contractors and engineering teams
- Implementation of safety and quality control procedures according to project standards

NEOM Power Generation Project

- Technical participation in substation and transformer support services

Pakistan Operations

ATC's operations in Pakistan focus on **infrastructure development, industrial maintenance, and facility engineering services.**

Primary sectors include:

- Power distribution and transformer projects
- Industrial maintenance contracts
- Petrol pump construction and fuel infrastructure
- Building construction and facility development
- Defense infrastructure support
- IT and smart systems integration
- High-rise building construction
- Engineering consultancy and design services
- Architectural design and planning
- Interior decoration and 3D design

ATC combines **local engineering teams with Saudi project supervision** to ensure efficient project delivery and international quality standards.

Key Client Experience

Army Welfare Trust (AWT)

Army Welfare Trust (AWT) is one of Pakistan's largest and most reputable corporate organizations, operating across multiple sectors including real estate development, financial services, industrial manufacturing, and commercial infrastructure.

AWT manages a diversified portfolio of **large-scale national developments across Pakistan**, including residential communities, commercial towers, industrial facilities, and corporate offices.

Ongoing Collaboration

Azaan Trading & Contracting Company (ATC) is currently engaged in executing **renovation, infrastructure, and technical works within facilities owned and operated by Army Welfare Trust.**

These works include:

- Civil renovation works
- Facility upgrades
- Infrastructure improvements
- Technical maintenance services

within AWT's operational properties.

Major AWT Developments

The Army Welfare Trust portfolio includes:

- **Askari Housing Developments**
- **Commercial office towers**
- **Industrial facilities**
- **Financial institutions, ASKARI Bank outlets and corporate offices.**

These developments require **continuous infrastructure upgrades, renovation, and maintenance services.**

Project Capability Demonstrated

Through its work with AWT, ATC demonstrates capability in:

- Civil infrastructure works (Roads Construction, Underground Electricity, Sewerage and Drainage, Lighting Poles)
- Building renovation and structural upgrades
- Mechanical, Electrical, Plumbing and HVAC works
- Facility maintenance services

Financial Strength

SPC (Saudi Operations) Annual Turnover

Up to **200 Million SAR**

This financial strength provides strong technical and operational backing for projects executed through ATC.

Organizational Structure

ATC operates through specialized engineering and operational departments:

- Civil Engineering Division
- Electrical & Power Engineering Division
- Mechanical & HVAC Division
- Oil & Gas Division
- Defense & Infrastructure Projects
- IT & Smart Systems
- Procurement & Trading
- Finance, HR & Administration
- Health, Safety & Quality

Leadership consists of **experienced engineers, project managers, and technical specialists** with extensive field experience in infrastructure and industrial projects.

Quality, Safety & Sustainability

ATC follows strict quality and safety standards aligned with international engineering practices.

- ISO-aligned quality management procedures
- Health, Safety & Environmental compliance
- Preventive safety systems
- Zero-accident operational target
- Energy-efficient engineering solutions
- OEM-standard maintenance practices

Future Outlook (2025 – 2030)

ATC and SPCSA aim to establish a **regional engineering and contracting alliance**, focusing on:

- Defense and secure infrastructure projects
- Power and energy distribution systems
- Oil, gas, and industrial plant services
- Renewable energy infrastructure
- Smart IT and digital infrastructure
- Public, Private and Industrial sector construction projects in Pakistan
