INTRODUCTION

About Us

Founded in 1991 by Chairman Engineer Aftab Hussain Siddiqui, Paragon Constructors has redefined the construction industry in Pakistan. Built on the pillars of Honesty, Sincerity, Hard Work, and Intelligence, Paragon continues to be the premier provider of construction services across the country meeting international standard.

With a team of highly skilled engineers, managers, and field staff specializing in civil engineering, Paragon has earned the respect and trust of clients by delivering some of Pakistan's most iconic projects. From complex concrete structures to high-rise buildings, heavy industrial developments, and power and communication projects, Paragon's portfolio showcases its commitment to quality, speed, and client satisfaction.

Over the past three decades, Paragon has been a driving force in the construction industry as it has always re-invested in the growth of the company. As a General Contractor it can undertake large-scale jobs under one roof from piling to structural works, architectural works, facade works, MEP works, and finishing works to the use of Building Information Modeling (BIM) to streamline the construction process.

VISION

To reach the highest level of Excellence and Professionalism in the construction industry.

MISSION

Committed to Excellence in all areas of Construction & Customer Services.

CORE VALUES

- Honesty
- Sincerity
- Hard Work
- Intelligence

A portrait of Aftab Hussain Siddiqui, a middle-aged man with grey hair and glasses, wearing a grey suit, a blue and white checkered shirt, and a red tie. He is looking directly at the camera with a neutral expression. The background is white with faint, stylized architectural elements like domes and minarets. A gold geometric pattern is visible in the top left corner.

MESSAGE BY THE CHAIRMAN

Established in 1991, I am proud to say that we have grown from a small name to one of the biggest in the construction industry of Pakistan. Paragon Constructors has contributed substantially to the economy of Pakistan and added the highest quality in construction by laying standards for others to follow. Much of the credit goes to the entire team who made this possible.

Together we have achieved tremendous success.

Over the years, our commitment to innovation and excellence has allowed us to expand our portfolio, undertaking landmark projects that shape the skyline of Pakistan. Our growth is a testament to the trust our clients place in us and the dedication of our workforce, who continue to push the boundaries. As we look ahead, we remain steadfast in our mission to build a future where our work not only serves communities but also leaves a lasting legacy for generations to come.

Aftab Hussain Siddiqui

Chairman,
Paragon Group of Companies

MESSAGE BY THE CEO

I am honored to lead a company that has continuously evolved and set new benchmarks in the construction industry. Since our inception in 1991, we have maintained a relentless focus on delivering excellence, ensuring that every project reflects the highest standards we are known for.

Our journey has been one of growth, innovation, and resilience. We have built not just structures but relationships based on trust and reliability. The success we enjoy today is the result of the hard work and passion of our talented team, as well as the faith our clients have placed in us. Looking forward, we are committed to further advancing our capabilities, embracing new technologies, and continuing to play a pivotal role in shaping the future of construction in Pakistan. Together, we will keep building with purpose, precision, and pride.

WHAT WE DO

Paragon delivers end-to-end construction solutions as a general contractor. We specialize in piling, MEP works, and civil structural construction. Our services also include infrastructure development, utility installations, and building interiors. With a focus on quality and efficiency, we manage every phase of the project.

High-rise Buildings

Power Plants

Refinery Works

Cement Plants

Commercial Buildings

**Piling, Shoring &
Dewatering**

**Hospitals &
Pharmaceuticals**

**Sports & Recreational
Facilities**

Textile Industry

Food Industry

**Fair Faced & Precast
Concrete Works**

Structural Steel Works

Infrastructure

Electrical Works

**Plumbing &
Sewerage Works**

NOTABLE PROJECTS

Some of Paragon's notable projects have been the construction of Wall's Ice Cream plant, Lucky Cement Plant, Byco Refinery, Allied Bank head office, GlaxoSmithKline (GSK) head office, Ocean Mall, Emaar Pearl, Emaar The Views, Eighteen Islamabad, IBA Aman Tower, Dolmen Mall, Telenor 345, IQRA University, Habib University, UBL Head Office, and many more.

We are currently constructing the Grand Mosque in Bahria Town Karachi, the third-largest in the world and Pakistan's largest, with a capacity of 800,000 worshippers. We are also building Pakistan's largest cancer facility, the Shaukat Khanum Hospital in Karachi, and the ICC-certified Rafi Cricket Stadium, which will seat 50,000 spectators and host future international matches.

CAPABILITIES - RESOURCES

Human Resource

Paragon Constructors is a leading organization with a strong team of over 500 professionals, including 150+ highly qualified engineers and more than 300 technical experts. Our workforce is committed to delivering excellence across various projects.

CAPABILITIES - RESOURCES

Equipment Expertise

Paragon Constructors is equipped with a comprehensive range of machinery to support efficient and high-quality project execution. Our fleet includes batching plants, concrete pumps, placing booms, transit mixers, cranes, wheel loaders, excavators, vibratory rollers, piling rigs, tractors, generators, and air compressors, ensuring reliable performance across all projects.

■ Batching Plants (25–60 m³ per hour)

■ Mobile Concrete Pumps

■ Stationary Concrete Pumps

■ Concrete Placing Booms

■ Transit Concrete Mixers

■ Tower Cranes (1.6–3 tonnes)

■ Mobile Cranes (25–200 tonnes)

■ Wheel Loaders (Caterpillar and SEM)

■ Excavators

■ Vibratory Rollers

■ Piling Rigs

■ Tractors

■ Generators (10–360 kVA)

■ Air Compressors

CAPABILITIES - RESOURCES

Specialized Formwork

Paragon uses a mix of imported and locally customized formwork solutions to deliver high-quality structural works. These include fair-faced and pre-cast concrete, post-tension slabs, and rammed earth construction. Our specialized formwork systems feature the RMD imported system, Peri/Doka wall system, plastic formwork, and post-tension slab solutions.

- RMD Imported System
- Peri/Doka Wall System
- Plastic Formwork (Imported)
- Post-Tension Slabs
- Rammed Earth Construction System

CAPABILITIES - MEP

MEP Services and Expertise

Paragon's MEP capabilities encompass a wide range of services, including advanced fire suppression systems, HVAC solutions, plumbing, power distribution, renewable energy, and specialized equipment. We provide integrated systems for vertical transportation, safety, and building management, ensuring efficiency, reliability, and safety in residential, commercial, and large-scale infrastructure projects.

■ Fire Suppression Systems

Sprinklers, Hydrants, NOVEC 1230

■ HVAC

Chilled Water Systems
Ventilation Systems
Active Chilled Beams
Cooling Towers

■ Plumbing

Water Supply and Drainage Systems
Water Management Systems
Irrigation Systems

■ Power Systems

HT, LT, and Power Distribution Systems

■ Power Backup Systems

UPS, Generators with Auto-Sync Auto Fuel Filling

■ Specialized Equipment

Gantries
Façade Cleaning Systems
Garbage Chutes
Waste Management

■ Vertical Transportation

Elevators, Escalators, and Conveyors
Building Management Systems

■ Renewable Energy

PV Modules

■ Safety & Emergency Systems

Fire Detection/Alarm Systems
Central Battery Systems
Emergency Lighting

■ Sewerage Treatment

■ Central Vacuum System

■ Access Control & Physical Safety

■ Earthing & Lightning Protection

■ LPG and Natural Gas Systems

CAPABILITIES

Industrial Buildings

Our industrial portfolio features projects like power plants, oil refineries, cement factories, and advanced production units.

- PAEC Power Plant
- Japan Power Plant
- Punjab Power Plant
- Bosicor Oil Refinery
- Lucky Cement Plant
- Novatex
- Yunus Textile Mills
- Lucky Textile Mills
- Fazal Textile Mills
- Orient Textile Mills
- Artistic Denim Mills
- Soorti Spinning Unit
- Latif Fibre Mills
- Naveena Export
- Aisha Steel Mills
- Pharmaceutical
- GlaxoSmithKline
- Wall's Ice Cream Factory

Residential and Commercial

Paragon builds residential units, high-rise apartments, and mixed-use commercial developments.

- Bahria Hotel Tower
- Opal 225 Tower
- Dolmen City Towers
- Hoshang Tower
- Creek View & Terraces
- Ocean Tower
- Emaar Pearl Towers
- UBL Head Office
- Aman Tower
- Artistic Tower
- Lucky One Mall
- Telenor 345 Headquarters

Public Buildings

Paragon builds public facilities and iconic projects like the Grand Mosque, meeting diverse community needs.

- Grand Mosque, Bahria Town (3rd largest mosque in the world)
- Rafi Cricket Stadium (35,000-seat stadium complex)
- Aga Khan Hospital (Ambulatory Care Building, Power Plant)
- Habib University City Campus
- Aman Tower, IBA Campus
- National Institute of Leather Technology
- Iqra University Campus
- Arabian Sea Country Club
- Bagh-e-Quaid-e-Azam (Civil works and rehabilitation)
- Southend Sports Club

Roads, Bridges, Culverts, and Sewerage Treatment Plants (STP)

Paragon builds roads, bridges, culverts and major commercial complexes, including Sewerage Treatment Plants.

- Motorway Underpass, M9
- Roads Network, Emaar
- Bridge, Bahria Town
- Box Culverts, Bahria Town
- STP, Defence Housing Authority
- Underpass, Bahria Town

CAPABILITIES - FAÇADE SYSTEMS

Paragon specializes in delivering advanced façade systems that combine aesthetics, functionality, and durability. Our solutions include curtain walls, cladding, glass façades, and aluminum composite panels, designed to enhance the visual appeal and energy efficiency of commercial and residential structures. With a focus on precision engineering and premium materials, we ensure modern, sustainable, and weather-resistant façades tailored to each project's unique requirements.

CAPABILITIES - INTERIOR FIT-OUTS

CAPABILITIES - INTERIOR FIT-OUTS

TECHNOLOGY

Paragon thrives with the support of cutting-edge project management technologies. We have never stopped in research, investment and adaptation of various tools which have helped us in successful completion of mega projects. Some of the advanced technologies we employ include:

Building Information Modeling (BIM)

Building Information Modeling (BIM) transforms construction projects by creating detailed 3D models on-the-go that integrate architectural, structural, and MEP systems. It enhances collaboration among stakeholders, improves project efficiency, and supports lifecycle management from design stage through maintenance which helps in close monitoring and defects identification of the project. Paragon uses BIM for development of coordinated services installation & project planning applications, coordination and shop drawing development.

Building Management System (BMS)

Building Management System (BMS) is an intelligent platform that automates and monitors a building's mechanical and electrical systems, such as HVAC, lighting, power, and security. It enhances energy efficiency, ensures occupant comfort, and enables real-time system control and fault detection for streamlined facility operations.

SAP 4 HANA ERP

In addition to our technical capabilities, we utilize robust software support systems to streamline construction, financial and administrative processes. This includes leveraging SAP S/4 Hana and SAP Fiori for integrated financial management and reporting.

Remote Monitoring

Our CCTV surveillance systems provide enhanced security across project sites, complemented by rigorous quality control protocols to ensure superior construction standards.

We implement:

- Project Monitoring and Quality Checks
- CCTV Real Time Monitoring from the Head Office/Project Office
- CCTV Real Time Monitoring Surveillance with RF Connectivity from the Head Office to All Sites

QUALITY ASSURANCE AND QUALITY CONTROL

Quality assurance and control is an important aspect of any construction project. Paragon has strict policies and procedures in place to ensure that their products and services meet the required quality standards. We have a quality control team that inspects the work at various stages of the project to ensure that it meets the required specifications. Paragon is also committed to continuous improvement by identifying areas for improvement and implementing corrective actions.

At Paragon, our unwavering commitment to quality is central to our vision and operations. We take pride in delivering some of the finest construction work in Pakistan. These projects stand as testament to our exceptional craftsmanship and dedication to our core values.

HEALTH, SAFETY AND ENVIRONMENT

Health, Safety, and Environment (HSE) is a cornerstone of Paragon's operations. We have established comprehensive policies and procedures to ensure that our employees are thoroughly trained in HSE practices and adhere to them on-site. This includes mandatory use of personal protective equipment (PPE), strict adherence to safety protocols, and prompt reporting of any incidents or near-misses. Paragon's unwavering commitment to HSE reflects our dedication to safeguarding our employees and preserving the environment.

Our HSE measures include:

- Comprehensive HSE risk assessments
- Ongoing HSE training and meeting sessions
- Personal Protective Equipment (PPE) allocation
- Deployment of safety officers and supervisors
- Installation of safety equipment
- Regular tool box talks
- Availability of first aid and medical personnel
- Monitoring hygienic & hazardous conditions
- Emphasis on housekeeping
- Avoiding environment-damaging activities

ACHIEVEMENTS

Largest Mosque

The Grand Jamia Mosque in Bahria Town Karachi is currently under construction and, upon completion, will be the largest mosque in Pakistan and the third-largest in the world, with an awe-inspiring capacity of 800,000 worshipers. This monumental structure is poised to become a true architectural and spiritual icon, symbolizing both cultural heritage and modern design excellence.

Largest Cricket Stadium

Paragon Constructors is developing the largest cricket stadium in Pakistan—the Rafi Cricket Stadium, located in Bahria Town Karachi, an ICC-certified facility with a seating capacity of 50,000. It also stands as the largest precast stadium structure in the country, utilizing advanced concrete technologies to ensure speed, scale, and efficiency. Designed to host future international cricket matches, the stadium marks a significant milestone in Pakistan's sports infrastructure development.

Largest Pile Load Test

Paragon conducted Pakistan's largest pile load test at Bahria Town Karachi. The test contributed significantly to foundational engineering practices for mega-structures in the region.

Performing of Osterberg Load Cell Test

A groundbreaking achievement in geotechnical testing, this project involved the first-ever Osterberg Load Cell Test in Pakistan. A 12,000 ton static load was applied on index piles with a diameter of 1,200 mm and depth of 26 meters, introducing this technology to the national industry.

First Use of SAP Technology in Construction

Paragon Constructors is the first construction company in Pakistan to integrate SAP technology into project execution and management, enhancing operational transparency, efficiency, and data-driven decision-making.

First Specialized Bunkers in Pakistan

Paragon pioneered the development of Pakistan's first specialized concrete bunkers, designed with advanced safety, durability, and functional specifications for critical infrastructure and defense-related applications.

Largest Cancer Hospital

Currently under construction, this landmark facility is set to become Pakistan's largest cancer treatment center. Designed with cutting-edge infrastructure and medical technology, it aims to significantly expand access to world-class cancer care across the nation—strengthening Pakistan's healthcare system and offering renewed hope to thousands of patients.

Largest Rammed Earth Commercial Project

This eco-conscious landmark in Islamabad uses stabilized rammed earth sourced locally. It offers excellent thermal insulation and reduced environmental impact. Telenor 345 is Pakistan's largest commercial building constructed with this technique.

Ready-Mix Cement Innovation

Paragon introduced Pakistan's first ready-mix cement for commercial use through Lucky Paragon, setting a new benchmark in the construction industry. This innovation brought enhanced quality control, consistency, and faster delivery for large-scale construction projects.

Highly Sophisticated Bio-Safety Lab

A one-of-its-kind Bio-Safety Lab (BSL) was constructed following the most stringent safety and quality standards. Features include washable, bacteria- and germ-resistant finishes, seamless floors, and specialized air circulation systems to meet international BSL requirements.

A Landmark Restoration of Quaid-e-Azam Mausoleum & Park

In a remarkable display of speed, scale, and precision, two major projects honoring the Father of the Nation were completed in record time. The cleaning and polishing of Quaid-e-Azam's Mausoleum was finished in just 7 days, involving high-risk operations at 100 feet with custom scaffolding and 24/7 safety protocols. Simultaneously, the Bagh-e-Quaid-e-Azam a 63-acre urban park in Karachi—was developed within just 9 months. It features over 500,000 sq. ft. of marble, surpassing even the Taj Mahal, and stands as Pakistan's largest urban garden, symbolizing national pride and architectural excellence.

Olympic-Standard Swimming Pool

An Olympic-sized swimming pool with 7 lanes was constructed, featuring a modern automatic filtration plant. Built to meet international specifications, the facility supports athletic development and event hosting.

Largest Concrete Pour in Pakistan

Paragon achieved the nation's largest single-day concrete pour, setting a new industry record in project execution and operational scale.

Emaar Crescent Bay – Residential Towers

As part of a 42-tower mega-development along Karachi's coastline, Paragon executed piling and foundation works for 3 towers. This involved 2,153 piles with a 1,000 mm diameter and 35 meters average depth. Project value: approx. Rs. 14 billion.

Emaar - The Views

The structural work for this premium residential project was completed a cycle of 7 days for ____area. It includes two high-rise towers: the North Tower (44 floors) and the South Tower (32 floors), demonstrating exceptional project planning and execution.

Tallest High-Rise Building in Pakistan

The Bahria Icon Tower stands as Pakistan's tallest high-rise building at 62 floors. It is also the country's largest commercial skyscraper, showcasing cutting-edge vertical construction techniques and premium real estate design.

Underwater Structure

This project includes two basements, each 18 feet deep, covering approximately 400,000 sq. ft., located just 40 feet from the shoreline. The water table is only 3 feet below the natural ground, making this a complex and technically challenging construction.
